#### **Keeping Your Kidneys Healthy**

**Wednesday, April 14, 6 p.m.**

Jeffrey Rosenberg, M.D., Nephrologist

One in nine adults has kidney disease. Join us to learn how your kidneys function, the common causes of kidney disease, the importance of early detection, and how to prevent further damage.

Meritage Room, Belhurst, Geneva

#### **Back Pain & Surgery**

**Wednesday, April 28, 6 p.m.**

Raman Dhawan, M.D., Orthopedic Surgeon

This presentation will explore surgery as a treatment option for back pain. Discussion will address how to determine if you're a candidate for back surgery and when surgery should be considered.

Meritage Room, Belhurst, Geneva

#### **Living with Congestive Heart Failure (CHF)**

**Date & Place TBA, 6 p.m.**

Taryn Draxler, M.D., Internal Medicine Physician, with special guest Joseph Gomez, M.D., Cardiologist

More than 3 million people have CHF and more than 400,000 new patients present with this condition annually. Join us to learn about this progressive condition in which the heart's function as a pump to deliver oxygen-rich blood to the body is inadequate to meet the body's needs.

#### **What Is Physiatry?**

**Thursday, May 13, 6 p.m.**

James Inzerillo, D.C., M.D., Physiatrist

Physiatry is a fast-growing specialty in today's medical arena. It addresses rehabilitation of all types of neuro-musculoskeletal complaints. Patients seeking care are often experiencing problems related to conditions such as: cerebral palsy, muscular dystrophy, stroke, multiple sclerosis, hip fractures, and pain.

Ramada Inn – Geneva Lakefront, Geneva

#### **Preventing Heart Disease**

**Wednesday, May 19, 6 p.m.**

Philipp C. Wirth, M.D., Internal Medicine Physician, with special guest Joseph Gomez, M.D., Cardiologist

Heart disease is the leading cause of death in the United States. Join us to learn the active role you can play in its prevention.

Hotel Clarence, Seneca Falls

#### **High Blood Pressure – Are You at Risk?**

**Wednesday, June 2, 6 p.m.**

Joseph Gomez, M.D., Cardiologist

People with high blood pressure usually experience no symptoms. However, left untreated, high blood pressure can lead to serious health complications. Attend this informative discussion of risk factors, diagnosis, and treatments.

Meritage Room, Belhurst, Geneva
